

a Model ability

CharXiv (mean across 39 models)

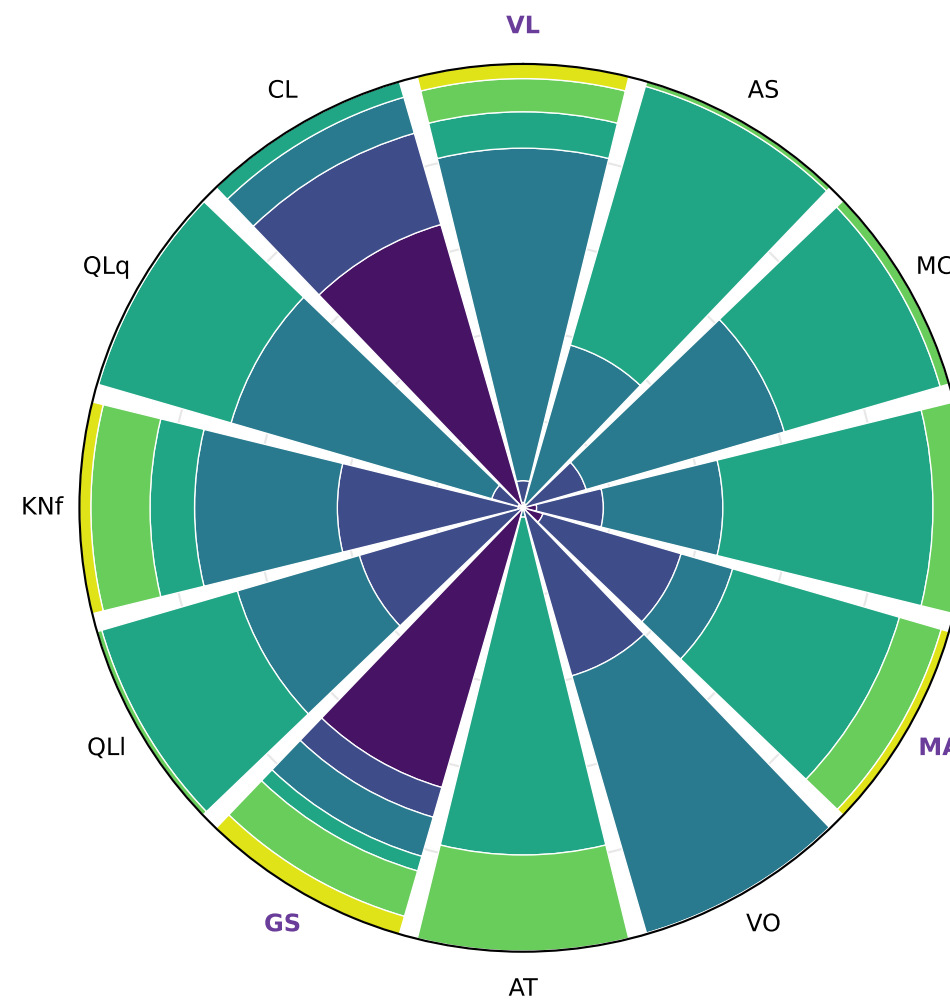

b Demand profiles (fraction of items per demand level)

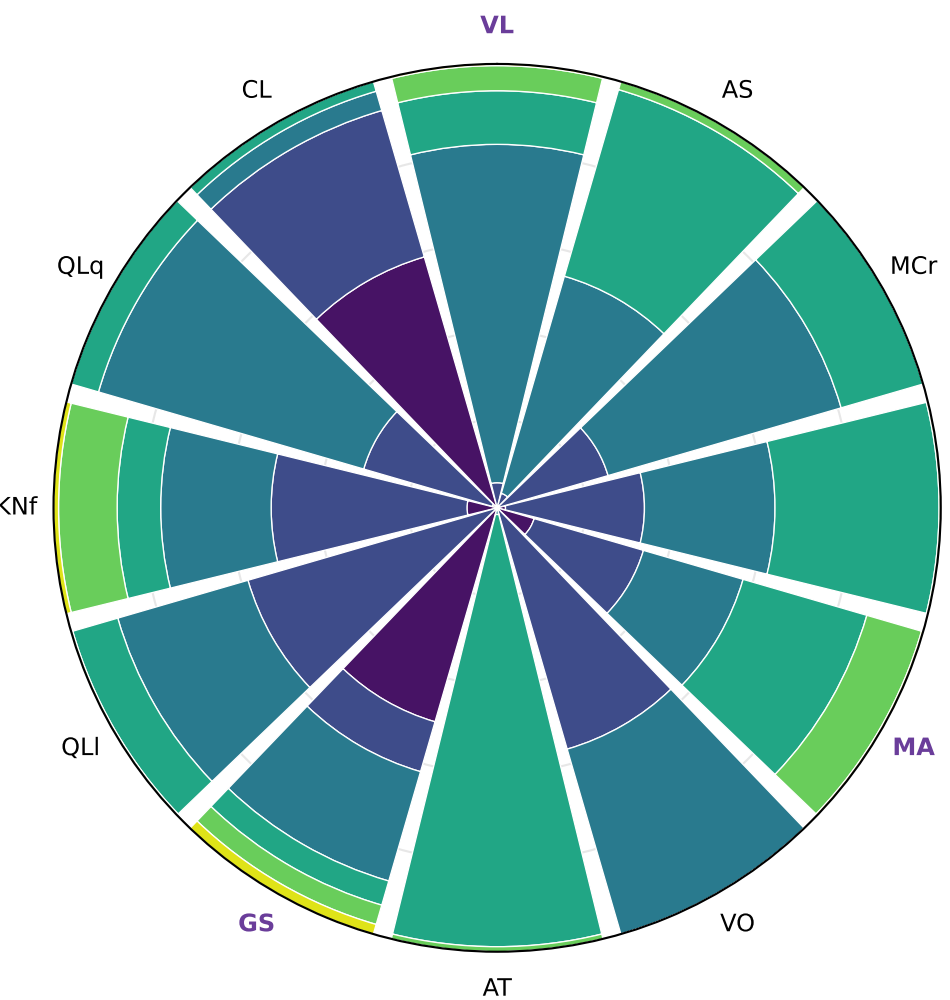

CharXiv (n=1000)

SciVer (n=817)

SciClaimEval (n=265)

demand level

- level 0
- level 1
- level 2
- level 3
- level 4
- level 5

Ability = area under the fitted logistic characteristic curve (P(correct) vs demand) over [0,5], AUC-as-is, 0-5 demand scale (CharXiv train, 39 models). Demand profiles use each dataset's full item set. ♦/purple = emergent figure-grounding dims.

Per-model ability radars (AUC-ability, shared radial scale) — spanning the accuracy range
