

Permutation vs out-of-fold TreeSHAP importance — agreement check (◆ purple = emergent figure-grounding dims)

A. Ranking agreement per model
92% of models $\rho > 0.5$, top-1 dim matches 68%

B. COMBINATION_ALL ranking
(near diagonal = methods concur)

C. How often each dim is top-3, by method
(perm-only dims = likely collinearity artifacts)
