

Per-model SHAP for demand dim VL ♦
(rows = models, top = most VL-sensitive; colour = item's VL demand 0-5)

Per-model SHAP for demand dim AS
 (rows = models, top = most AS-sensitive; colour = item's AS demand 0-5)

Per-model SHAP for demand dim MCr
(rows = models, top = most MCr-sensitive; colour = item's MCr demand 0-5)

Per-model SHAP for demand dim MCu
(rows = models, top = most MCu-sensitive; colour = item's MCu demand 0-5)

Per-model SHAP for demand dim MA ♦
(rows = models, top = most MA-sensitive; colour = item's MA demand 0-5)

Per-model SHAP for demand dim VO
(rows = models, top = most VO-sensitive; colour = item's VO demand 0-5)

Per-model SHAP for demand dim AT
 (rows = models, top = most AT-sensitive; colour = item's AT demand 0-5)

Per-model SHAP for demand dim GS ♦
(rows = models, top = most GS-sensitive; colour = item's GS demand 0-5)

Per-model SHAP for demand dim QLI
(rows = models, top = most QLI-sensitive; colour = item's QLI demand 0-5)

Per-model SHAP for demand dim KNf
 (rows = models, top = most KNf-sensitive; colour = item's KNf demand 0-5)

Per-model SHAP for demand dim QLq
(rows = models, top = most QLq-sensitive; colour = item's QLq demand 0-5)

Per-model SHAP for demand dim CL
(rows = models, top = most CL-sensitive; colour = item's CL demand 0-5)
